#### Notice

### **Notice**

Thank you for purchasing a HUMAX product. Please read this user's manual carefully to be able to safely install, use and maintain the product at maximum performance. Keep this user's manual next to your product for future reference. The information in this user's manual is subject to change without notice.

### Copyright (Copyright © 2012 HUMAX Corporation)

Not to be copied, used or translated in part or whole without HUMAX's prior consent in writing except approval of ownership of copyright and copyright law.

### Meaning of Symbols

To reduce the risk of electric shock, do not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified service personnel.

This symbol indicates dangerous voltage inside the product that presents a risk of electric shock or personal injury.

This symbol indicates important instructions accompanying the product.

### Warnings, Cautions and Notes

Throughout the whole manual, pay special attention to the following marks that indicate hazardous situations.

### Warning

Indicates a hazardous situation which could result in serious injury

### Caution

Indicates a situation which could damage the equipment or other apparatus **Note** 

Indicates additional information to make the user aware of possible problems and information of any importance to help understand, use and maintain the installation.

### Warranty

The warranty does not cover parts which may become defective due to misuse of the information contained in this manual

#### 'WFFF' Instructions

This product should not be disposed with other household wastes at the end of its working life. Please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources. This will prevent possible harm to the environment or human health from uncontrolled waste disposal.

#### Domestic users:

Please contact either the retailer where you purchased this product or their local government office for details of where and how they can take this item for environmentally safe recycling.

### **Business users:**

Contact your supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

#### Trademarks

Irdeto is a trademark of Irdeto Access B.V.

### For Your Safety

### Safety Instructions

#### 1. POWER SUPPLY

- Operate this product only from the type of power supply shown on the marking label. If you do not know the type of power supplied to your home, contact your local power company.
- Disconnect the power supply before you start any maintenance or installation procedures.

### 2. OVERLOADING

 Make sure that the wall outlet, extension cord and adapter have a sufficient power rating for the appliance. If not, this can cause an electric fire shock

#### 3. LIOUID

 Do not expose this product to liquids. Do not put objects filled with liquid on the product.

#### 4. CLEANING

- Disconnect the product from the wall outlet before you clean it.
- Use a moist cloth to clean the product. Do not use solvents. Wipe the surface gently with a soft cloth as it may get scratched.

#### 5. VENTILATION

- Make sure that the slots on top of the product are not blocked. It is necessary to have a sufficient airflow into the unit.
- Do not put electronic equipment on the product.
- Do not put objects on the product. This will block the ventilation or cause damage to the surface.

#### 6. ATTACHMENTS

 Do not use any unsupported attachments as these may be hazardous or cause damage to the product.

#### 7. LIGHTNING, STORM OR NOT IN USE

 Unplug the product from the wall outlet and disconnect the antenna during a thunderstorm or when left unattended and unused for long periods of time. This will prevent damage to the unit due to lightning and power-surges.

#### 8. EXTRANEOUS OBJECTS

 Do not insert anything through the openings in the unit, where they can touch dangerous voltage points or damage parts.

#### 9. REPLACEMENT OF PARTS

 When replacement of parts is required, be sure the service technician uses replacement parts specified by the manufacturer or those that have the same characteristics as the original part. Unauthorised substitution may result in additional damage to the unit.

### 10. CONNECTION TO THE SATELLITE DISH LNB/CABLE TV SIGNAL/AERIAL

 Disconnect the power supply before you connect or disconnect the cable from the satellite dish/ cable TV signal/aerial. If not, this can cause damage to the LNB/cable TV line/aerial.

#### 11. CONNECTION TO THE TV

 Disconnect the power supply before you connect or disconnect the cable from the TV.
 If not, this can cause damage to the TV.

### 12. EARTHING (satellite only)

 Earth the LNB cable to the system earth for the satellite dish

#### 13. LOCATION

- Place the product indoors to avoid exposure to lightning, rain or sun. Do not place it near a radiator or heat register.
- Keep at least 10 cm clearance from any other appliances susceptible to electromagnetic influences such as a TV or a VCR.
- If you place the product on a rack or a bookcase, make sure that there is adequate ventilation and that you have followed the manufacturer's instructions for mounting.
- Do not place the product on an unstable surface where it can fall. A falling product can

cause serious injury to a personnel and serious damage to the appliance.

### Cautions and Warnings

### 1. To avoid damage of the power cord or plug

- Do not modify or process the power cord or plug arbitrarily.
- Do not bend or twist the power cord.
- Make sure to disconnect the power cord while you hold the plug.
- Keep heating appliances as far as possible from the power cord to prevent the cover vinyl from melting.
- The mains plug, as a disconnection device, shall remain readily accessible by the user.

#### 2. To avoid electrical shock

- · Do not open the main body.
- Do not insert metal or inflammable objects inside the product.
- · Do not touch the power plug with wet hands.
- Disconnect the power cord in case of lightning.
- Unplug the power cable before you install the antenna cable.

### 3. To avoid damage of product

- Do not use the product when it is out of order. If you continue to use the product when defective, this may cause serious damage. Make sure to contact the customer service centre if the product is out of order.
- Do not insert metal or alien substance into the slots for the modules or Smartcards. It may cause damage to the product and reduce its life span.

### 4. To avoid damage of the hard disk drive (PVR only)

- Do not move the product or turn the power off suddenly while the hard disk drive is running.
- The company shall not be liable for any corruption of data on the hard disk drive caused by carelessness or misuse of the user.

#### Ouick Start Guide

### Connections

This section describes how to connect your product to match your particular devices and to gain optimum signal quality.

**Warning:** Connect all devices before you plug any power cords into the wall outlet. Always turn off the product, TV and other devices before you connect or disconnect any cables.

**Note:** If you encounter any problems setting up your product, please contact your local retailer or HUMAX Customer Service

### Connecting the Antenna

Connect the aerial to the LNB IN.

### Connecting the TV

2-1 Using an HDMI cable

For the best picture quality, use an HDMI cable to connect to the TV.

2-2 Using an RCA cable

For good picture quality, use an RCA cable to connect to the TV.

### Powering On

- 1. Connect the power cord of the product to a wall outlet.
- 2. Power on by pressing the **STANDBY** button on the remote control or the **STANDBY** button at the front panel.

#### Ouick Start Guide

### Wizard

The installation wizard operates automatically when you power on the product for the first time or do factory default in menu.

Note: If you exit the installation wizard without fully completing the channel searching procedure, you may not have all of the channels available. In this case, go to MENU > Settings > Installation and search for more channels.

### 1. Language

Select the appropriate language from the list.

### 2. Display

Set the video output to your TV.

### 3. GMT Offset

Select your country to determine the time zone.

### 4. Search Channels

- Automatic Search: Search all channels of NILESAT(7.0W) and BADR(26.0E) and HOT BIRD(13.0E) automatically.
- Skip: If you have SCD or motor antenna, skip the search process and go to MENU > Settings > Installation.

### 5. Automatic Search

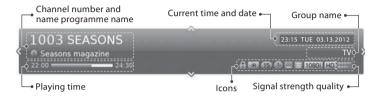

Channel search will begin automatically. Save the found channels when the search is complete.

### 6. Result

The result of the installation wizard will show. Select Finish to exit the wizard.

### Programme Information (i-Plate)

The i-plate is an information banner that is displayed for a few seconds whenever you change channels. Press the i button while you watch a programme to display the i-plate. Press the EXIT button to hide it.

| i          | Viewing detailed programme information Press the i button again while the i-plate is displayed.   |
|------------|---|
| <b>◆○▶</b> | Viewing Previous/next programme information Press the ◀/▶ button while the i-plate is displayed.  |
|            | Viewing Programme information of other channels Press the ▲/▼ button while the i-plate is displayed. Press the OK button to change to the selected channel. |

#### Icons

|       | Locked Programme    |

#### TV Guide

### TV Guide

You can access the TV guide in several ways.

- Press the GUIDE button.
- Press the MENU button and select TV Guide.

#### Note:

- Press the  ${\bf i}$  button to view the detailed programme information.
- 🕒 : Scheduled programme

### Watching Programmes

- Select a programme and press the OK button. The programme will display in the preview.
- 2. Press the **OK** button again to exit the TV guide and watch the programme.

### Setting Reminders

- 1. Select a future programme and press the **OK** button.
- Press the OK button again to cancel the reservation.
   The reserved programmes will be added automatically to Schedule.

### **Finding Programmes**

To find the programmes specifically according to the keyword or genre, press the **GREEN** button.

### **Scheduling Reminders**

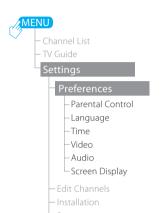

To schedule the reminders, press the YELLOW button.

### **Changing Group**

To list the channels of other groups, press the **BLUE** button and select a group you want.

#### Preferences

### Preferences

### Parental Control

- Maturity Rating: You can block the programme if the programme is above the age limit.
- Change STB Password: Enter a new password.

#### Note:

- The default password is 0000. If you have forgotten your password, please contact your local distributor.
- Enter the password to view the blocked programmes.

### Language Setting

You can set the system language, audio language or subtitle language.

### Setting Power On/Off Timer

You can set the time the receiver powers on or powers off.

### Video Setting

- Screen Ratio: You can select the screen ratio of your TV
- Resolution: You can set the resolution of the screen.
- **Display Format:** You can select the display format according to the screen ratio of your TV.
- Letterbox & Pillarbox Colour: You can select the colour of the margin space in Letterbox or Pillarbox mode.

### Audio Setting

- Digital Audio Output: You can select the digital audio signal output.
- **Lip-Sync:** You can adjust the sound difference between audio and video.

### Screen Display

- Info Display Time: You can set the duration the i-plate is displayed whenever you change the channel.
- Transparency: You can set the transparency of the On-Screen Display.
- Subtitle Font: You can set the subtitle font.

#### Installation

### Search Channels [Fixed Antenna]

**Installation** allows you to configure your antenna and search the TV and radio channels.

MENU > Settings > Installation

- 1 Press the RED button and select Fixed Antenna. Select OK to save and exit.
- 2 Select Search Channels and press the OK button. Select Switch Type and select LNB Onlyor DiSEqC.
- 3 Select a satellite figure and press the **OK** button.
  - · Satellite: Select the satellite.
  - LNB Frequency: Select the LNB frequency.
  - 22kHz Tone: Select the DiSEgC switch.
  - DiSEqC: Select the DiSEqC switch.
  - Test Transponder: Check the signal status of each transponder and select the one with the best quality. Select OK.

Note: When Switch Type is set to DiSEqC, both 22kHz Tone and DiSEqC are activated.

- 4 Select Transponder under the activated satellite figure and press the OK button. Select a value in the transponder list.
- 5 Select **Search** and press the **OK** button. The found channels will be listed.
- 6 When the search is completed, select **Save** and press the **OK** button.

- Select **User Define** to enter the options directly.
- All channels will be deleted if you change the antenna type.
- The default password is 0000. If you have forgotten your password, please contact your local distributor.

### Search Channels [SCD Antenna]

**Single Cable Distribution** enables the delivery of broadcast programming over a single cable to multiple users eliminating the numerous cables required to support other electronics devices.

If you are using more than one satellite receiver, set one receiver at a time and turn off the others while setting. Refer to the satellite antenna manual for details.

### MENU > Settings > Installation

- Press the **RED** button and select **SCD Antenna**. Select **OK** to save and exit.
- 2 Select **Search Channels** and press the **OK** button.
- 3 Select **SCD Setting** and press the **OK** button to set the channel(band) and frequency for this receiver.
  - Tuner1: Select from Channel 1~8.
  - Frequency: The frequency is set based on the channel of tuner1. Select **OK**.
- 4 Select a satellite figure and press the **OK** button.
  - Satellite: Select the satellite.
  - LNB Frequency: Select the LNB frequency.
  - Test Transponder: Check the signal status of each transponder and select the one with the best quality. Select **OK**
- 5 Select Transponder under the activated satellite figure and press the OK button. Select a value in the transponder list.
- 6 Repeat the two steps above to set more satellites.
- 7 Select **Search** and press the **OK** button. The found channels will be listed.
- 8 When the search is completed, select **Save** and press the **OK** button.

- Select **User Define** to enter the options directly.
- Select **Stop** and press the **OK** button to stop the channel search.
- · All channels will be deleted if you change the antenna type.
- The default password is 0000. If you have forgotten your password, please contact your local distributor.

### Search Channels [Motor Antenna]

You can set the position of the satellites when you use a motor antenna for efficient channel search.

MENU > Settings > Installation

- Press the **RED** button and select **Motor Antenna**. Select **OK** to save and exit.
- 2 Select **Search Channels** and press the **OK** button.
- 3 Select **Motor Setting** and press the **OK** button to set the motor type and location.
  - · Motor Type:
  - DiSEqC1.2: General motor antenna using DiSEqC 1.2.
  - **USALS:** Motor antenna using USALS.
  - My Longitude: Enter the longitude and direction.
  - My Latitude: Enter the latitude and direction.
  - LNB Frequency: Enter the LNB frequency.

Select OK.

Note: When Motor Type is set to DiSEqC 1.2, both My Longitude and My Latitude are inactivated.

4 Select **Edit Satellite Data** and press the **OK** button to select the satellites that the motor antenna is pointing to. Select satellites using the ▲/▼ and **OK** button.

When selecting User Define, enter the Longitude and Direction.

Press the BACK button to save and return.

- 5 Select Position Setting and press the OK button to set the antenna position for the selected satellites.
  - · Satellite: Select the satellite.
  - Transponder: Select the transponder.
  - · Motor Driving: Continuous Step Time
  - Driving Size: When motor driving is set to Step or Time, select one from 1~127.
  - Go to Stored Position: Make the antenna turn toward the position of the selected satellite.
  - Fine-tune the position using the **\(\sim\)** button until the signal strength and quality reach the maximum level.
  - Store Current Position: Save the adjusted position.
  - Recalculate: Recalculates the positions of all satellites based on the position of current satellite.

Press the BACK button to save and return.

Note: When Motor Type is set to USALS, Motor Driving, Store Current Position and Recalculate are inactivated.

#### Installation

- 6 Select Limit Setting and press the OK button to set the operation limit of the motor.
  - · Limit Position: Select East or West.
  - Set Limit: Set the operation limit to East or West using the ◀/▶ button.
  - Reset Position: Initialise the position of the motor antenna to the factory default.
     Press the BACK button to save and return.
- <sup>7</sup> Select a satellite you want to search.
- 8 Select **Transponder** under the activated satellite figure and press the **OK** button. Select a value in the transponder list.
- 9 Select **Search** and press the **OK** button. The found channels will be listed.
- 10 When the search is completed, select **Save** and press the **OK** button.

#### Note:

- · When you use a motor antenna, only the channels of one satellite can be searched.
- · Repeat the search process to search more satellites.
- Select **Stop** and press the **OK** button to stop the channel search.
- · All channels will be deleted if you change the antenna type.
- The default password is 0000. If you have forgotten your password, please contact your local distributor.

### Software Update

MENU > Settings > Installation > Software update

### Automatic Update

- 1. Select Automatic Update.
- 2. When new software is detected, select to start the update process.

### Manual Update

- 1. Select Manual Update.
- 2. Enter the search options.
- Select Search and press the OK button to search for new software.
- 2. When new software is detected, select **Yes** to start the update process now.

### Note:

- It may take 5~10 minutes to update the software.
- When the software update is completed, the product is automatically powered off and on again.

### **Factory Default**

MENU > Settings > Installation

- 1. Select Factory Default.
- 2. A popup will appear. Select Yes.
- 3. You will be prompted to enter the password. Enter the password.

#### Note:

 The default password is 0000. If you have forgotten your password, please contact your local distributor.

Warning: Note that once you perform factory default, all user configured data will be reset. Shortly after you complete the factory default, the installation wizard will appear automatically.

### **Trouble Shooting**

Before contacting the customer service centre, make sure to read the tips below carefully. If the problem persists after you complete the following procedure, please contact HUMAX customer service for further instructions.

### No message is displayed on the front display. (The product will not switch on.)

- Check the main power cable and make sure it is plugged into a suitable power outlet.
- Check that the mains supply is switched on.
- Connect the power cable to a different power outlet.
- Check that the power switch is on at the rear of the product. (where applicable)

#### 2. No picture

- Make sure that the product is powered on and in operation mode. (Press the STANDBY button)
- Make sure that the AV cable is firmly connected to the TV.
- Make sure that the antenna cable is properly connected to the product.
- Be sure to activate channel search.
- Check the brightness level of the TV.
- · Check if the channel is currently on air.
- $\boldsymbol{\cdot}$  Make sure that STB or PVR is selected as input on the remote control.
- Make sure that the antenna setting in the menu is correct. (satellite only)

### 3. Poor picture/sound quality

- Make sure there is no mobile phone or microwave oven near the product.
- Keep the power cable and the RF cable apart from each other.

**Note:** If the antenna is covered with snow or the RF is weakened by heavy rain, the condition of the sound and picture may temporarily be poor. However, poor sound and picture quality due to weather conditions cannot be accepted as a malfunction of product.

### [Satellite]

- Change the satellite dish for a larger one as this will increase the signal levels received.
- Replace the LNB with a lower noise factor in cases where the noise factor is too high.
- Replace the LNB with a lower noise factor in case the noise factor is too high.

- Replace the LNB with a new one in case it is damaged or out of order.
- Install the antenna in an obstacle-free place.
- Check the signal levels and adjust your antenna if the level is too low. The signal level may be affected by weather conditions.

#### [Terrestrial]

- · Adjust the antenna direction to get a better picture.
- Set the antenna power in menu to On, if you use the active antenna to improve the reception. (where applicable)

### 4. No or poor sound

- Check that your AV cable is connected correctly.
- Check the volume levels of your TV set and the product.
- · Check if the product or TV is on mute.
- Check audio type or soundtrack option. (where applicable)

### 5. Remote control does not operate.

- To control the product, the top end of the remote control should point directly towards the receiving part of the product.
- · Remove and reinsert the batteries in the remote control.
- Replace the batteries in the remote control for a new set.
- Set the remote control to STB or PVR mode, if you are using the universal remote control. (where applicable)

#### 6. Cannot make reservations.

 Check that no previous reservations are conflicting with the new reservation.

### 7. No password information is given.

• The default password is 0000.

#### 8. Channel search does not work.

- [Satellite] Make sure that the antenna setting in the menu is correct.
- [Cable] Make sure that your cable is connected correctly.
- [Terrestrial] Use the appropriate antenna capable of receiving VHF or UHF channels for your area.

### 9. Cannot update new software.

 If the product does not show a message requesting update, this means no software is available.

### **Appendix**

#### 10. Cannot watch scrambled channels.

- Check that you have the appropriate Smartcard or CI-Module. Reinsert the Smartcard or CI-Module and make sure it initialises correctly.
- Check in the menu that the product is detecting the Smartcard or CI-Module.
- Check in the menu that you have a valid subscription to the channels you want to view.
- Make sure that the Smartcard or CI-Module is not damaged.

#### 11. Cannot watch pay channels.

• Check in the menu that you have a valid and working subscription to the channels you wish to view.

### 12. The product makes a humming noise.

• The noise is from the fan; the hard disk is operating normally.

### 13. Cannot record progammes. (PVR only)

- The hard disk is full. Delete unnecessary programmes and make space for new recording.
- Check if the recording conflicts with another channel. Stop the current recording or wait until the recording is finished.
- Check that the product is switched on when the recording starts.

### 14. Cannot operate Time Shifted Recording. (PVR only)

- TSR may not be available during recording. Wait until the recording is finished.
- Delete unnecessary programmes and make space for new recording.

### 15. Cannot playback. (PVR only)

- To playback the recorded file of a scrambled channel, use the Smartcard.
   In case it has been a long time since you last recorded, this may not work.
   Contact the product distributor.
- The signal during recording may be weak or the hard disk too full.

### 16. Cannot change channels while recording. (PVR only)

 Certain channels may not be changed due to restriction of the tuner or connection type.

### **HUMAX Customer Support**

Information concerning troubleshooting, software upgrade and product support is provided in the following website. Should your product require warranty service, please contact the customer service center of which telephone number is on the website.

|     | Middle East<br>(Dubai, UAE) | Tel:                              | +971 4 359 2323                          |

|                                 | Smartcard is damaged.  | Contact your Smartcard retailer or channel broadcaster and ask for replacement.   |
| CI-Module not installed         | CI-Module not installed<br>CI-Module is not inserted.                      | Insert the CI-Module.   |
|                                 | CI-Module is not inserted correctly.                                       | Remove the CI-Module and reinsert it.   |
|                                 | CI-Module is not recognised.   | Insert another CI-Module to check if the current one is working.  |
| Invalid CI-Module               | Wrong CI-Module  | Insert the correct CI-<br>Module.   |
|                                 | CI-Module is damaged.  | Replace the CI-Module.  |
| The antenna cable is            | LNB cable is short.  | Replace the LNB cable.  |
|                                 | LNB is internally short.   | Replace the LNB.  |
| short-circuited.<br>[Satellite] | Alien substance is inserted into the LNB IN port. The port may be damaged. | Remove the alien substance and contact the service centre if the port is damaged.   |

### **Appendix**

### Glossary

#### CVBS (Composite Video Baseband Signal)

A technology for transmitting video signals via a cable. Mixes luminance (brightness) and the chrominance (colour) signals together.

#### DiSEqC (Digital Satellite Equipment Control)

A DiSEqC compatible receiver relies on a switching box which detects the 22kHz tone pulsing rapidly on and off. In this way, a certain receiver can control numerous LNBs through a DiSEqC switching box.

#### **Dolby Digital**

An encoding system that digitally compresses up to 5.1 discrete channels of audio (left front, centre, right front, left surround, right surround) into a single Bitstream. A low frequency effect (LFE) channel is included providing the sound needed for special effects.

#### DVB (Digital Video Broadcasting)

A set of standards that define digital broadcasts using satellite, cable or terrestrial systems.

#### EPG (Electronic Programme Guide)

An electronic equivalent to a printed television listings magazine. It is an application used with digital set-top boxes and digital television sets to list current and scheduled programmes that are or will be available on each channel, including a short summary or commentary for each programme. The information supplied in the EPG is sent and updated by the channel broadcaster.

#### FEC (Forward Error Correction)

A technique for error control of data transmission.

#### Frequency

The property of a signal measured in cycles per second (=Hz).

#### FTA (Free-To-Air)

An unscrambled broadcaster allowing customers to view channels or services without paying any subscription.

#### HDMI (High-Definition Multimedia Interface)

An all-digital audio/video interface that supports standard, enhanced, or high-definition video, plus multichannel digital audio on a single cable. It transmits all ATSC HDTV standards and supports 8-channel digital audio.

#### LNB (Low Noise Block)

A device that is mounted on an arm facing your satellite dish, focusing on satellite signals. A LNB converts signals received from satellite to a lower frequency and sends them to a satellite receiver via coaxial cable.

#### OTA (Over the Air)

A standard for the transmission of software for equipment, through a broadcast system. Manufacturers reserve the right for deciding the release of the software for their products.

#### Polarisation

The direction of the electrical and magnetic fields of a signal. Satellites use both vertical and horizontal polarisation, meaning that a frequency can be used twice.

#### QPSK (Quadrature Phase Shift Keying)

Digital modulation technique in which the carrier phase can have one of four possible values.

#### RF (Radio Frequency)

Television signals are modulated onto RF signals and are then demodulated by the tuner of your TV or STBs•

#### RGB (Red - Green - Blue)

A technology for transmitting video signals via a cable. RGB is a system to represent red, green, and blue colours on a TV or monitor display. Red, green, and blue can be combined in various proportions to obtain any colour.

#### Smartcard

A credit card sized card that contains updateable chip memory. It is used to access Pay TV (encrypted) channels or services.

#### S/PDIF (Sony/Philips Digital Interface format)

A standard format for the transfer of digital audio signals. It allows the transfer of digital audio between two devices without any conversion to and from analogue, which could degrade the signal quality.

#### Transponder

A satellite is divided up in parts called transponders. A transponder is one distribution section of thes satellite. Each transponder can be used for distribution of several channels or services.

### Open Source Software Notice

HUMAX products use certain open source operating system software distributed pursuant to GNU GENERAL PUBLIC LICENSE Version 2 and GNU LESSER GENERAL LICENSE Version 2.1 each as defined and published by he Free Software Foundation, Inc.

The following GPL and LGPL software source codes used in this product can be provided and this offer is valid for up to three years from the date of original download of the software or purchase of product containing such software. Please contact us at gnu@humaxdigital.com.

#### GPI Software

tinyftp

This package, the ext2 filesystem utilities, are made available under the GNU Public License version 2, with the exception of the lib/ext2fs and lib/ezp libraries, which are made available under the GNU Library General Public License Version 2, the lib/uuid library which is made available unde a BSD-style license and the lib/et and lib/ss libraries which are made available under an MIT-style license.

#### LGPL Software

FFmpeg
This software uses libraries from the FFmpeg project under the LGPLv2.1

#### FreeType License (FTL) Software

Portions of this software are copyright © <2007> The FreeType Project All rights reserved.

Use, modification and redistribution of the Open Source Software is governed by the terms and conditions of the applicable Open Source License. The GNU General Public License (GPL) v2 is shown below.

#### The GNU General Public License (GPL) Version 2 June 1991

Version 2, 34th 1991 Copyright (C) 1989, 1991 Free Software Foundation, Inc.51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software-to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too. When we speak of free software, we are referring to freedom, not price. Our Genera Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you

know you can do these things.
To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restric-tions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations. Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for veryone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modifica-

#### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law; that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter translation is included without limitation in the term "modification".) Each licensee is addressed as "vou"

Activities other than copying, distribution and modification are not covered by this License, they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only its contents constitute a work based on the Program lindependent of having been made by running the Program). Whether that is true depends

on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously code as you receive it, in any medium, provided mat you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty, keep intact all the notices that refer to this License and to the absence of any warranty, and give any other recipients of the Program a copy of this License along with the Program. You may charge a fee for the physical act of transferring a copy, and you may at your

option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that

you also meet all of these conditions:
a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.) These requirements apply to the modified work as a whole. If identifiable

sections of that work are not derived from the Program, and can be reason-ably considered independent and separate works in themselves, then this Licénse, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the rogram. In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

You may copy and distribute the Program (or a work based on it. under 3. Cuton 3) Cuton and constructive the roll plant of a whole season of in, one of sections 1 and 2 and ve any third party, for a charge no more than your cost of physically

performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections and 2 above on a medium customarily used for software interchange; or, I all a above of in redutif Lostinally used to solve the filter training, or, c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.) The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable. If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access

to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the

source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their censes terminated so long as such parties remain in full compliance. . You are not required to accept this License, since you have not signed t. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your accept-ance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these ferms and conditions. You may not impose any further restrictions on the

and conditions, you may not impose any furner restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of example, if a patent incerise would not permit royally-rise redistribution on the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program. If any portion of this section is held invalid or unenforceable under any particular dircumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances. It is not the purpose of this section to induce you to infinge any patients its right up pupper of interest section to induce you to infinge any patients or other property right claims or to contest validity of any such claims; this section has the sole pumping of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made open ous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice. This section is intended to make thoroughly clear what is believed to be a

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written the body of this License.

The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address. new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later flees" you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software

Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation, write to the Free Software Foundation, write to the Free Software Foundation. exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

NO WARRANTY TI. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING TH COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR AS IS WITHOUT WARRANTIVE PAY THAT MINO, EITHER EXPRESSED OR MIRNELE, INCLUDING, BUT NOT VAINTED TO, THE IMPLIED WARRANTIES OF MIRCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE STRING RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM MOVED EPECTURY YOU ASSUME THE COST OF ALL NECESSARY SERVING, REPAR FOR CORRECTION. 12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY

WHO MAY MODIEY AND/OR REDISTRIBLITE THE PROGRAM AS PERMITTED. ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROCARAM TO OPERATE WITH ANY OTHER PROCARAMS). EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF

END OF TERMS AND CONDITIONS
How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest iossible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms. To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does

One line to give the program's name and a brief lege of what it does. Copyright (C) yy, name of author This program; is the software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version. This programs is distributed the cheep that "ivill be useful by with HOUT ANY WARRANTY, without even the implied warranty of MERCHANTABILITY or FITES FOR A PARTICULAR PURPOSE. See the GNU General Public License for more. details. You should have received a copy of the GNU General Public License along with this program, if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA. Also add information on how to contact you by electronic and paper mail. If the program is interactive, make it output a short notice like this when it starts an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOI LITE! Y NO WARRANTY: for details type 'show w' This is ee software, and you are welcome to redistribute it under certain condiions; type `show & for details.

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items-whatever suits your program. You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample: alter the names:

Here is a sample, after the harries: Vpcyodyne, inc., hereby disclaims all copyright interest in the program Gnomovisor (which makes passes at compilers) written by James Hacker. Ty Coon, Preddent of Vice. This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library, if this is what you want to do, use the GNU Library General Public License instead of this License

### GNU Lesser General Public License (LGPL)

Version 2.1, February 1999
Copyright (C) 1991, 1999 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing t is not allowed

It is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, bence the version.

#### Preamble

ne licenses for most software are designed to take away your freedom o share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This license, the Lesser General Public License, applies to some specially

designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordiwe suggest you inst mink carefully about whether this license or the Ordi-nary General Public License is the better strategy to use in any particular case, based on the explanations below. When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things. To protect your rights, we need to make that you can but here it might, in protect, your might, we need to thake restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions franslate to certain responsibilities for you if you modify it. For example, if you distribute copies of the library or if you modify it. For example, if you distribute copies of the library, whether graits or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients.

so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights. We protect your rights with a two-step method: (1) we copyright the library and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library. To protect each permission to copy, distribute and/or modily the library. To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems hat might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict. users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license. Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain ibraries in order to permit linking those libraries into non-free programs When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library. We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers' Less of an advantage over competing non-free programs.
These disadvantages are the reason we use the ordinary General Public icense for many libraries. However, the Lesser license provides advantages in certain special circumstances. For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library so that it becomes a de-facto standard. To achieve this, non-free ms must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, use the Lesser General Public License. In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNUC Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system. Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library. The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND

 This License Agreement applies to any software library or other 0. This License Agreement applies to any sortware library or or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as 'you'. A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executa-bles. The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".) "Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library. Activities other than copying, distribution and modification are not covered by this License; they are outside its scope The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the ogram that uses the Library does.

. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyrig notice and disclaimer of warranty, keep intact all the notices that refer to this License and of the absence of any warranty, and distribute a copy of this License along with the Library. You may charge a fee for the physica act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it,

thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that

Industriations of which are the terminon assection in according to the control of If a facility in the modified Library refers to a function or a table of data

to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful (For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots) These requirements apply to the modi ed work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licenses extend to the entire whole, and thus to each and every part regardless of who wrote it

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you, rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library. In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under ne scope of this License

the scope of this License. As you may off the ordinary GNU General Public. J. You may orb to apply the terms of the ordinary GNU General Public. License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices. Once this change is made in en copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy. This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

You may copy and distribute the Library (or a portion or derivative of 4. Total may copy and a distribute real burlay (or a portion) or derivative on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange. If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

. A program that contains no derivative of any portion of the Library, but 3. A program that contains in deviative or any potention for the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License. However, linking a "work that uses the Library" with the Library. creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

en a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is espe-cially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law. If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten layous and accessors, and striam inactor and strain infillier including the lines or less in length), then the use of the object file is unrestricted, regard-less of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.) Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a work that uses the Library with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.
You must give prominent notice with each copy of the work that the
Library is used in it and that the Library and its use are covered by this Li-

displays copyright notices, you must include the copyright notice for the of this License Also, you must do one of these things: a) Accompany the work with the complete corresponding machine

readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above): and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in he Library will not necessarily be able to recompile the application to use

he modified definitions) b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library allready present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
c) Accompany the work with a written offer, valid for at least three years o give the same user the materials specified in Subsection 6a, above, for a harge no more than the cost of performing this distribution. d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified

materials from the same place e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library

must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable

It may happen that this requirement contradicts the license restrictions of It may happen that this requirement contradicts the license restrictions of other proprietal libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distributed on the Library 7. You may place library facilities that ea work based on a single library facilities not side-by-side in single library loggether with other library facilities not

covered by this License, and distribute such a combined library, provided hat the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be Give prominent notice with the combined library of the fact that part

of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work. 8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise

o copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License Il not have their licenses terminated so long as such parties remain in

You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing

therise is 0 to 50, and a link terms are conductive to 10 copying, distributing or modifying the library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

eniorung companie by mind parises with this Lickese.

11. If, as a consequence of a court judgment or allegation of patent in-fringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library. If any portion of this section is held invalid or unenforceable under any particular circumstance the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances. It is not the purpose of this

cense. You must supply a copy of this License. If the work during execution section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generatives which is sufficient to the process of the proc ous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice. This section is ntended to make thoroughly clear what is believed to be a consequence of the rest of this License

12 If the distribution and/or use of the Library is restricted in certain. countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written n the body of this License

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in

detail to address new problems or concerns. Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation 4. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the ree Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

### HUMAX thanks you for your recent HUMAX product purchase.

For your benefit, we recommend that you record your serial number, found on the product, and other purchase information on this card and keep it with your personal records, along with proof of purchase. This information will allow us to better serve your needs.

#### WARRANTY CONDITIONS

Keep this Certificate together with the original invoice or receipt in a safe place and show them to the retailer or place of purchase whenever a warranty repair is necessary.

#### HUMAX CONSUMER WARRANTY

HUMAX warrants this product to be free of defects in materials and workmanship, subject to the conditions set forth overleaf.

#### CONDITIONS

- 1. The HUMAX Warranty is valid for a period of one year from the date of first purchase.
- In the event that this product fails to function properly during the warranty period, the retailer or distributor will make this product capable of operating for the purpose of which it was designed, without charging for labour and parts.
- This warranty will be honoured only if the Warranty Certificate has been duly completed by the purchaser and is presented to the retailer with the original invoice or receipt.
- I. This warranty does not cover shipping or transportation charges from you to us.
- The obligations of the distributor are limited to the repair of defect parts. Costs and risks of transport to the retailer as well as removal and installation of the product, and any other costs directly or indirectly related to its repair, are not covered by the warranty.
- All warranty repairs performed by non-authorized repair shops will not be reimbursed and if such repairs damage this product such damage will not be covered by this warranty.
- 7. This warranty is not applicable in cases other than defects in materials or workmanship and, in particular, does not cover:
  - a. periodic check-ups, adjustments, maintenance or conversions as well as replacement of parts due to normal wear and tear;
  - damage caused by accidents, negligence, modifications, use of non-HUMAX parts, improper use, installation or package;
  - damage caused by lightning, water, fire, acts of war, public disturbances, incorrect mains voltages, incorrect ventilation or any other cause beyond the control of the distributor:
  - d. products where the label bearing the serial number has been removed, defaced or is illegible.
- 8. This warranty is offered to any person who has legally obtained possession of this product within the warranty period.
- HUMAX's maximum liability shall not exceed the actual purchase price paid by you
  for the product. In no event shall HUMAX be liable for special, incidental, consequential or indirect damages.

achat et de la conserver avec vos données personnelles, conjointement avec votre preuve d'achat. Ces informations nous permettront de mieux répondre à vos attentes.

#### ■ CONDITIONS DE GARANTIE

Conservez le certificat conjointement avec la facture ou le reçu original dans un endroit sûr. Présentez-les à votre revendeur ou à votre lieu d'achat dès que votre produit nécessite une réparation sous garantie.

#### **■** GARANTIE CLIENT HUMAX

HUMAX garantit que ce produit ne présente aucun défaut au niveau des matériaux et de la fabrication, conformément aux conditions mentionnées au verso.

#### CONDITIONS

- La garantie HUMAX est valide pour une période d'un an, à compter de la date de l'achat initial.
- Dans l'éventualité où ce produit ne fonctionnerait pas correctement au cours de la période de garantie, le revendeur ou le fournisseur local s'engage à le faire fonctionner conformément à la finalité pour laquelle il a été conçu, sans facturer de frais supplémentaires pour la main-d'œuvre et les pièces.
- La présente garantie ne s'applique que si le certificat de garantie a été dûment complété par l'acheteur et que ce certificat est présenté au revendeur conjointement avec la facture ou le recu original.
- La présente garantie ne couvre pas les frais d'expédition ou de transport entre l'acheteur et HUMAX.
- Les obligations du revendeur se limitent à la réparation des pièces défectueuses. La présente garantie ne couvre pas les coûts et les risques liés au transport à destination du revendeur, ceux associés à l'installation et à l'enlèvement du produit ainsi que tout autre coût directement ou indirectement lié à sa réparation.
- Les coûts liés aux réparations sous garantie effectuées par un atelier de réparation non autorisé ne seront pas remboursés. En outre, si le produit est endommagé lors de telles réparations, les dégâts causés ne seront pas couverts par la présente garantie.
- 7. La présente garantie ne s'applique pas aux cas autres que les défauts de matériaux ou de main-d'œuvre et ne couvre pas, en particulier :
  - a. les vérifications périodiques, les réglages, la maintenance ou les transformations ainsi que le remplacement de pièces en raison de l'usure normale;
  - les dégâts causés par des accidents, par négligence, par l'apport de modifications, par l'utilisation de pièces non HUMAX, par une utilisation incorrecte ou lors de l'installation ou l'emballage;
  - les dégâts causés par la foudre, l'eau, le feu, les faits de guerre, les troubles publics, des tensions de secteur incorrectes, une mauvaise ventilation ou toute autre cause indépendante de la volonté du revendeur;
  - d. les produits dont l'étiquette portant le numéro de série est illisible, a été enlevée ou abîmée.
- . La présente garantie est offerte à toute personne qui est entrée en possession de ce produit légalement au cours de la période de garantie.
- La responsabilité maximale d'HUMAX ne peut pas dépasser le prix d'achat que vous avez payé pour acquérir le produit. En aucun cas HUMAX ne peut être tenu pour responsable des dommages-intérêts particuliers, accessoires, secondaires ou indirects.
